

RTS PORTAL ONE

A new world for your business on SAP® Business One

Employees, partners and customers will have all the information they need to operate successfully.

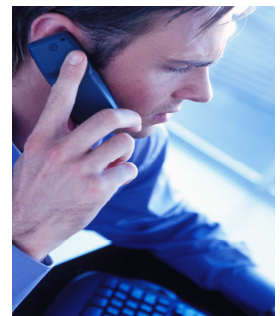

RTS PORTAL ONE is the new interactive portal thought and developed by Run Time Solutions S.r.l. to increase your business. Fully integrated to SAP Business One and based on J2EE WEB technologies, it may be used through a simple remote connection without the need of more software installation. Information, applications and services will be available anytime and anywhere.

Featuring a modular structure, RTS PORTAL ONE may be implemented and configured for responding to different projects and needs. Structured on three modules and available as both *on site* and *on demand* version, RTS PORTAL ONE ensures:

- ✓ *Information access security* thanks to the use of authentication and authorization instruments which allow a secure communication between users and resources anytime.
- ✓ *Full integration* with SAP Business One.
- ✓ *Flexibility and scalability* for adapting to different business needs.

WEB CRM ONE

WEB CRM ONE is the Web-based CRM solution for SAP Business One. Designed to manage Marketing and Sale activities, the solution is based on 100% web architecture that allows to have updated information in real time anytime and anywhere thanks to a direct and secure connection with the corporate database. WEB CRM ONE allows to manage all information linked to customers and leads, to monitor sales opportunities, to plan activities and appointments, to create quotations and sales orders via Internet. Besides, WEB CRM ONE allows to the managers managing a sales budget for individual sales person based on customers and/or items in order to monitor their sales force activities constantly.

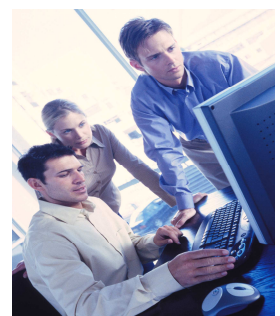

WEB EC ONE

WEB EC ONE is a fully integrated to SAP Business One module which allows you to integrate e-commerce features in your web site.

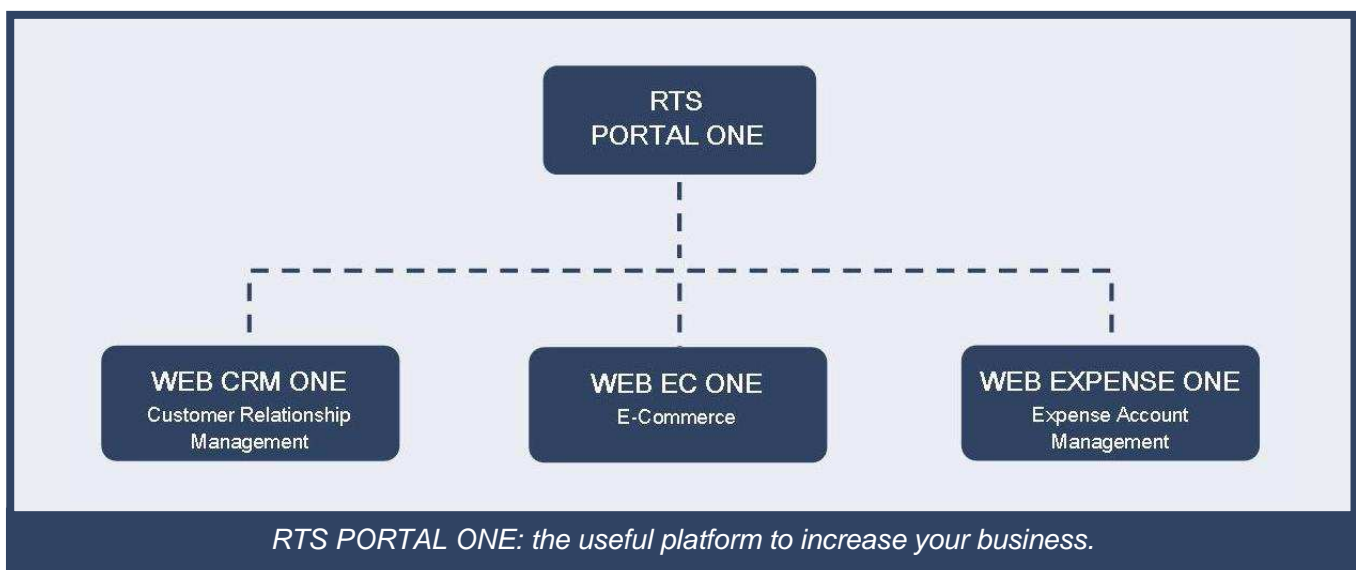

Your customers, through a simple web interface, will be able to view your showroom with the main deals, to consult your products, to check the availability, to calculate a quote and to create a sales order directly.

From SAP Business One directly, you can decide which items will be available in the online catalog, which customers will be enabled to purchase via web and which promotions will be activated. Thanks to the customer authentication, the system will apply the business conditions assigned to it in SAP Business One automatically.

WEB EXPENSE ONE

WEB EXPENSE ONE is the web solution to expense account management with *SAP Business One*. Employees and co-workers will be able to enter their expense account related to projects, customers or travels through a simple Internet browser. All WEB EXPENSE ONE data are fully integrated with *SAP Business One* accounting. Moreover, thanks to mailing module, it's possible to manage a workflow for the approval process by email too.
